# POLLUTION

Good morning/afternoon to our respected Principal ma'am, Headmistress ma'am, teachers and my dear friends. I am Gaurav Sahoo of class VIII, Section 10, present here to deliver a speech on the topic 'POLLUTION'.

As you know pollution has been a big environmental issue all over the world. It is affecting the human and other living beings lives to a great extent. It has been taken the form most powerful enemy which is destroying the natural environment very fast. There are a variety of hazardous and toxic substances from different sources that get mixed with environment causing various types of pollution. People should understand the importance of environment they live in and respect the one given by God to live a simple life on the earth (the only known planet having life).

Various types of pollution such as water pollution, soil or land pollution, air pollution, and sound or noise pollution, all are very harmful to the health of human beings and animals. People have been used to of technological advancement in their lives and forgot about all the existing problems because of that. Use of various fertilizers and other chemicals in the agriculture for many years in order to get better and healthy crops has created serious problem to the humanity. Pollution can be reduced by following some simple methods like the use of biogas and other renewable sources of energy (solar, wind and water) should be encouraged, bicycles, public transport and cars pools should be encouraged, tree plantation should be encouraged to reduce the amount of of carbon dioxide and dust particles in the air, domestic and industrial sewage should be treated properly to remove poisonous substances before disposing them into water bodies and etc.

Pollution is affecting our lives so we have to take individual steps and do every possible things what we can do. We should not

depend only on our government actions for some positive changes. Common people like us are the main factor to stop the spread of pollution. I would like to thank all, present in this morning assembly to lend me a patient ear and hope that my words will have a positive impact on everyone present in the assembly.
